

## Environmental Policy

### **Making a world of difference...**

Greentec is a leader in providing customers with reverse logistics and e-recycling services. We envision a world of economic sustainability and ecological harmony through reverse logistics and e-recycling solutions. Greentec will hold its customers and the environment at the center of its business.

### **Our commitment**

Providing the means to collect and recycle print cartridges, cell phones, and e-waste is making a world of difference for our customers and the environment. We promise to always search for solutions to generate value for both.

We will maintain and continuously improve our comprehensive Environmental Management System to ensure a high standard of operations, and commit to the prevention of pollution of all types. We will efficiently and effectively identify and resolve any potential environmental hazards associated with our operation.

We will maintain and communicate our environmental goals, objectives, practices and procedures to all Greentec associates and suppliers and will comply with all applicable regulatory requirements and other requirements to which we may subscribe.

We will coach our associates on the environmental aspects of our business and their responsibilities related to environmental management.

We will review our policy regularly, make it available to the public, and audit our processes to continually improve our environmental performance.

We will hold our customers at the center of our enterprise.
